SUBJECT: NRC LICENSE APPLICATION

Dear Ms. Frye,

This is in follow-up to our telephone call on June 18, regarding an NRC License application. Under reciprocity, you are limited to 180 days working in NRC jurisdiction. Therefore, if you anticipate exceeding the 180 day limit during the calendar year, then you will need to request an NRC License. Enclosed is a copy of NUREG-1556, Volume, 2, "Program Specific Guidance About Industrial Radiography Licenses." Please review this guidance document and submit an NRC Form 313 (enclosed) with the necessary documentation as requested in NUREG-1556, Volume 2. You may use Appendix C as guidance for your license application. Please note, that for some of the items, you may check the corresponding box to indicate that you will perform that particular element, while other items require that you submit procedures to document the specific program element(s). The NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

Please contact Ms. Brenda Brown at 301-415-6055 to discuss the application fee and the annual fee amounts. Additionally, Ms. Brown can provide information regarding small entity reductions in the annual fee amount and how to request a small entity reduction.

Please recognize that it typically takes 90 days to process a new NRC License application. We will work with you to the best of our ability so that the timing of the license is at the end of the 180 day reciprocity limit. However, this will take coordination as well as a good application package. Please take into consideration that the technical review may identify omissions or technical issues that require additional information and therefore may cause a delay in the processing of your application. Please feel free to call me if you have any questions at (817) 276-6552, as we work through this process.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at:  
<http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

*/RA/*
