Brian: Just to let you know we have started the process of looking into the issues you raised in the interview and with the tapes/photos. I hope to be able to give you something more concrete next Thursday and you will hear from me before that regarding that '81 report for something I would hope you would work into the script to put the report in context.

With regard to the tapes/stills, obviously it would help our folks if we could get copies and I look forward to hearing from you on Monday. If there are violations of our requirements, they would probably be necessary as evidence -- but I'll let the lawyers figure that out.

Thanks for sharing the material with us.

Eliot Brenner
