**F. CLAUSES INCORPORATED BY REFERENCE**

1. FAR 52-217-7, "Option for Increased Quantity Separately Priced Line Item."
2. FAR 52.232-7, "Payments under Time-and-Materials and Labor-hour Contracts."
3. FAR 52.243-3, "Changes -- Time-and-Materials or Labor-Hours."

**G. 2052.209-73 CONTRACTOR ORGANIZATIONAL CONFLICTS OF INTEREST**

(a) Purpose. The primary purpose of this clause is to aid in ensuring that the contractor:

(1) Is not placed in a conflicting role because of current or planned interests (financial, contractual, organizational, or otherwise) which relate to the work under this contract; and

(2) Does not obtain an unfair competitive advantage over other parties by virtue of its performance of this contract.

(b) Scope. The restrictions described apply to performance or participation by the contractor, as defined in 48 CFR 209.570- 2 in the activities covered by this clause.

(c) Work for others.

(1) Notwithstanding any other provision of this contract, during the term of this contract the contractor agrees to forgo entering into consulting or other contractual arrangements with any firm or organization, the result of which may give rise to a conflict of interest with respect to the work being performed under this contract. The contractor shall ensure that all employees under this contract abide by the provision of this clause. If the contractor has reason to believe with respect to itself or any employee that any proposed consultant or other contractual arrangement with any firm or organization may involve a potential conflict of interest, the contractor shall obtain the written approval of the contracting officer before the execution of such contractual arrangement.

(2) The contractor may not represent, assist, or otherwise support an NRC licensee or applicant undergoing an NRC audit, inspection, or review where the activities that are the subject of the audit, inspection or review are the same as or substantially similar to the services within the scope of this contract (or task order as appropriate), except where the NRC licensee or applicant requires the contractor's support to explain or defend the contractor's prior work for the utility or other entity which NRC questions.

(3) When the contractor performs work for the NRC under this contract at any NRC licensee or applicant site, the contractor shall neither solicit nor perform work in the same or similar technical area for that licensee or applicant organization for a period commencing with the award of the task order or beginning of work on the site (if not a task order contract) and ending one year after completion of all work under the associated task order, or last time at the site (if not a task order contract).

(4) When the contractor performs work for the NRC under this contract at any NRC licensee or applicant site,

(i) The contractor may not solicit work at that site for that licensee or applicant during the period of performance of the task order or the contract, as appropriate.

(ii) The contractor may not perform work at that site for that licensee or applicant during the period of performance of the task order or the contract, as appropriate, and for one year thereafter.

(iii) Notwithstanding the foregoing, the contracting officer may authorize the contractor to solicit or perform this type of work (except work in the same or similar technical area) if the contracting officer determines that the situation will not pose a potential for technical bias or unfair competitive advantage.

(d) Disclosure after award.

(1) The contractor warrants that to the best of its knowledge and belief, and except as otherwise set forth in this contract, it does not have any organizational conflicts of interest as defined in 48 CFR 2009.570-2.

(2) The contractor agrees that, if after award, it discovers organizational conflicts of interest with respect to this contract, it shall make an immediate and full disclosure in writing to the contracting officer. This statement must include a description of the action which the contractor has taken or proposes to take to avoid or mitigate such conflicts. The NRC may, however, terminate the contract if termination is in the best interest of the government.

(3) It is recognized that the scope of work of a task-order-type contract necessarily encompasses a broad spectrum of activities. Consequently, if this is a task-order-type contract, the contractor agrees that it will disclose all proposed new work involving NRC licensees or applicants which comes within the scope of work of the underlying contract. Further, if this contract involves work at a licensee or applicant site, the contractor agrees to exercise diligence to discover and disclose any new work at that licensee or applicant site. This disclosure must be made before the submission of a bid or proposal to the utility or other regulated entity and must be received by the NRC at least 15 days before the proposed award date in any event, unless a written justification demonstrating urgency and due diligence to discover and disclose is provided by the contractor and approved by the contracting officer. The disclosure must include the statement of work, the dollar value of the proposed contract, and any other documents that are needed to fully describe the proposed work for the regulated utility or other regulated entity. NRC may deny approval of the disclosed work only when the NRC has issued a task order which includes the technical area and, if site-specific, the site, or has plans to issue a task order which includes the technical area and, if site-specific, the site, or when the work violates paragraphs (c)(2), (c)(3) or (c)(4) of this section.

(e) Access to and use of information.

(1) If in the performance of this contract, the contractor obtains access to information, such as NRC plans, policies, reports, studies, financial plans, internal data protected by the Privacy Act of 1974 (5 U.S.C. Section 552a (1988)), or the Freedom of Information Act (5 U.S.C. Section 552 (1986)), the contractor agrees not to:

(i) Use this information for any private purpose until the information has been released to the public;

(ii) Compete for work for the Commission based on the information for a period of six months after either the completion of this contract or the release of the information to the public, whichever is first;

(iii) Submit an unsolicited proposal to the Government based on the information until one year after the release of the information to the public; or

(iv) Release the information without prior written approval by the contracting officer unless the information has previously been released to the public by the NRC.

(2) In addition, the contractor agrees that, to the extent it receives or is given access to proprietary data, data protected by the Privacy Act of 1974 (5 U.S.C. section 552a (1988)), or the Freedom of Information Act (5 U.S.C. section 552 (1986)), or other confidential or privileged technical, business, or financial information under this contract, the contractor shall treat the information in accordance with restrictions placed on use of the information.

(3) Subject to patent and security provisions of this contract, the contractor shall have the right to use technical data it produces under this contract for private purposes provided that all requirements of this contract have been met.

(f) Subcontracts. Except as provided in 48 CFR 2009.570-2, the contractor shall include this clause, including this paragraph, in subcontracts of any tier. The terms contract, contractor, and contracting officer, must be appropriately modified to preserve the Government's rights.

(g) Remedies. For breach of any of the above restrictions, or for intentional nondisclosure or misrepresentation of any relevant interest required to be disclosed concerning this contract or for such erroneous representations that necessarily imply bad faith, the Government may terminate the contract for default, disqualify the contractor from subsequent contractual efforts, and pursue other remedies permitted by law or this contract.

(h) Waiver. A request for waiver under this clause must be directed in writing to the contracting officer in accordance with the procedures outlined in 48 CFR 2009.570-9.

(i) Follow-on effort. The contractor shall be ineligible to participate in NRC contracts, subcontracts, or proposals therefore (solicited or unsolicited), which stem directly from the contractor's performance of work under this contract. Furthermore, unless so directed in writing by the contracting officer, the contractor may not perform any technical consulting or management support services work or evaluation activities under this contract on any of its products or services or the products or services of another firm if the contractor has been substantially involved in the development or marketing of the products or services.

(1) If the contractor, under this contract, prepares a complete or essentially complete statement of work or specifications, the contractor is not eligible to perform or participate in the initial contractual effort which is based on the statement of work or specifications. The contractor may not incorporate its products or services in the statement of work or specifications unless so directed in writing by the contracting officer, in which case the restrictions in this paragraph do not apply.

(2) Nothing in this paragraph precludes the contractor from offering or selling its standard commercial items to the Government.

#### H. PROJECT OFFICER

The contracting officer's authorized representative(s) hereinafter referred to as the project officer(s) for this delivery order is:

Administrative Project Officer: Penelope Kinney  
NMSS/PBPA/OB  
T8A-23  
301-415-7805  
PMK1@NRC.GOV

Technical Project Officer: Joseph Sebrosky  
NMSS/DSFST/LID  
E3D2M  
(301) 492-3325  
JMS3@NRC.GOV

- (a) Performance of the work under this delivery order is subject to the technical direction of the NRC project officer. The term "technical direction" is defined to include the following:
- (1) Technical direction to the delivery order or which shifts work emphasis between areas of work or tasks, authorizes travel which was unanticipated in the Schedule (i.e., travel not contemplated in the Performance Based Statement of Work (PBSOW) or changes to specific travel identified in the PBSOW), fills in details, or otherwise serves to accomplish the contractual PBSOW.
  - (2) Provide advice and guidance to the contractor in the preparation of drawings, specifications, or technical portions of the work description.
  - (3) Review and, where required by the delivery order, approval of technical reports, drawings, specifications, and technical information to be delivered by the contractor to the Government under the delivery order.
- (b) Technical direction must be within the general performance based statement of work stated in the delivery order. The project officer does not have the authority to and may not issue any technical direction which:
- 
- (1) Constitutes an assignment of work outside the general scope of the delivery order.
  - (2) Constitutes a change as defined in the "Changes" clause of this delivery order.
  - (3) In any way causes an increase or decrease in the total estimated delivery order cost, the fixed fee, if any, or the time required for delivery order performance.
  - (4) Changes any of the expressed terms, conditions, or specifications of the delivery order.
  - (5) Terminates the delivery order, settles any claim or dispute arising under the delivery order, or issues any unilateral directive whatever.
- (c) All technical directions must be issued in writing by the project officer or must be confirmed by the project officer in writing within ten (10) working days after verbal issuance. A copy of the written direction must be furnished to the contracting officer. A copy of NRC Form 445, Request for Approval of Official Foreign Travel, which has received final approval from the NRC must be furnished to the contracting officer.
- (d) The contractor shall proceed promptly with the performance of technical directions duly issued by the project officer in the manner prescribed by this clause and within the project officer's authority under the provisions of this clause.

- (e) If, in the opinion of the contractor, any instruction or direction issued by the project officer is within one of the categories as defined in paragraph (c) of this section, the contractor may not proceed but shall notify the contracting officer in writing within five (5) working days after the receipt of any instruction or direction and shall request the contracting officer to modify the delivery order accordingly. Upon receiving the notification from the contractor, the contracting officer shall issue an appropriate delivery order modification or advise the contractor in writing that, in the contracting officer's opinion, the technical direction is within the scope of this article and does not constitute a change under the "Changes" clause.
- (f) Any unauthorized commitment or direction issued by the project officer may result in an unnecessary delay in the contractor's performance and may even result in the contractor expending funds for unallowable costs under the delivery order.
- (g) A failure of the parties to agree upon the nature of the instruction or direction or upon the contract action to be taken with respect thereto is subject to 52.233-1 - Disputes.
- (h) In addition to providing technical direction as defined in paragraph (b) of the section, the project officer shall:
  - (1) Monitor the contractor's technical progress, including surveillance and assessment of performance, and recommend to the contracting officer changes in requirements.
  - (2) Assist the contractor in the resolution of technical problems encountered during performance.
  - (3) Review all costs requested for reimbursement by the contractor and submit to the contracting officer recommendations for approval, disapproval, or suspension of payment for supplies and services required under this delivery order.
  - (4) Assist the contractor in obtaining the badges for the contractor personnel.
  - (5) Immediately notify the Security Branch, Division of Facilities and Security (SB/DFS) (via e-mail) when a contractor employee no longer requires access authorization and return of any NRC issued badge to SB/DFS within three days after their termination."
  - (6) Ensure that all contractor employees that require access to classified Restricted Data or National Security Information or matter, access to sensitive unclassified information (Safeguards, Official Use Only, and Proprietary information) access to sensitive IT systems or data, unescorted access to NRC controlled buildings/space, or unescorted access to protected and vital areas of nuclear power plants receive approval of SB/DFS prior to access in accordance with Management Directive and Handbook 12.3.

(End of Clause)

**I. SECURITY REQUIREMENTS**

**I.1 SECURITY**

- (a) Contract Security and/or Classification Requirements (NRC Form 187). The policies, procedures, and criteria of the NRC Security Program, NRC Management Directive (MD) 12 (including MD 12.1, "NRC Facility Security Program;" MD 12.2, "NRC Classified Information Security Program;" MD 12.3, "NRC Personnel Security Program;" MD 12.4, "NRC Telecommunications Systems Security Program;" MD 12.5, "NRC Automated Information Systems Security Program;" and MD 12.6, "NRC Sensitive Unclassified Information Security Program"), apply to performance of this contract, subcontract or other activity. This MD is incorporated into this contract by reference as though fully set forth herein. The attached NRC Form 187 furnishes the basis for providing security and classification requirements to prime Contractors, subcontractors, or others (e.g., bidders) who have or may have an NRC contractual relationship that requires access to classified Restricted Data or National Security Information or matter, access to sensitive unclassified information (Safeguards, Official Use Only, and Proprietary information) access to sensitive Information Technology (IT) systems or data, unescorted access to NRC controlled buildings/space, or unescorted access to protected and vital areas of nuclear power plants.
- (b) It is the Contractor's duty to protect National Security Information, Restricted Data, and Formerly Restricted Data. The Contractor shall, in accordance with the Commission's security regulations and requirements, be responsible for protecting National Security Information, Restricted Data, and Formerly Restricted Data, and for protecting against sabotage, espionage, loss, and theft, the classified documents and material in the Contractor's possession in connection with the performance of work under this contract. ~~Except as otherwise expressly provided in this contract, the Contractor shall, upon~~ completion or termination of this contract, transmit to the Commission any classified matter in the possession of the Contractor or any person under the Contractor's control in connection with performance of this contract. If retention by the Contractor of any classified matter is required after the completion or termination of the contract and the retention is approved by the contracting officer, the Contractor shall complete a certificate of possession to be furnished to the Commission specifying the classified matter to be retained. The certification must identify the items and types or categories of matter retained, the conditions governing the retention of the matter and their period of retention, if known. If the retention is approved by the contracting officer, the security provisions of the contract continue to be applicable to the matter retained.
- (c) In connection with the performance of the work under this contract, the Contractor may be furnished, or may develop or acquire, safeguards information, proprietary data (trade secrets) or confidential or privileged technical, business, or financial information, including Commission plans, policies, reports, financial plans, other (Official Use Only) internal data protected by the Privacy Act of 1974 (Pub. L. 93-579), or other information which has not been released to the public or has been determined by the Commission to be otherwise exempt from disclosure to the public. The Contractor shall ensure that information protected from public disclosure is maintained as required by NRC regulations and policies, as cited in this contract or as otherwise provided by the NRC. The Contractor will not directly or indirectly duplicate, disseminate, or disclose the information in whole or in part to any other person or organization except as may be necessary to perform the work under this contract. The Contractor agrees to return the information to the Commission or otherwise dispose of it at the direction of the contracting officer. Failure to comply with this clause is grounds for termination of this contract.

- (d) Regulations. The Contractor agrees to conform to all security regulations and requirements of the Commission which are subject to change as directed by the NRC Division of Facilities and Security (DFS) and the Contracting Officer. These changes will be under the authority of the FAR Changes clause referenced in this document.

The Contractor agrees to comply with the security requirements set forth in NRC Management Directive 12.1, NRC Facility Security Program which is incorporated into this contract by reference as though fully set forth herein. Attention is directed specifically to the section titled "Infractions and Violations," including "Administrative Actions" and "Reporting Infractions."

- (e) Definition of National Security Information. The term National Security Information, as used in this clause, means information that has been determined pursuant to Executive Order 12958 or any predecessor order to require protection against unauthorized disclosure and that is so designated.
- (f) Definition of Restricted Data. The term Restricted Data, as used in this clause, means all data concerning design, manufacture, or utilization of atomic weapons; the production of special nuclear material; or the use of special nuclear material in the production of energy, but does not include data declassified or removed from the Restricted Data category pursuant to Section 142 of the Atomic Energy Act of 1954, as amended.
- (g) Definition of Formerly Restricted Data. The term Formerly Restricted Data, as used in this clause, means all data removed from the Restricted Data category under Section 142-d of the Atomic Energy Act of 1954, as amended.
- ~~(h) Definition of Safeguards Information. Sensitive unclassified information that specifically identifies the detailed security measures of a licensee or an applicant for the physical protection of special nuclear material; or security measures for the physical protection and location of certain plant equipment vital to the safety of production of utilization facilities. Protection of this information is required pursuant to Section 147 of the Atomic Energy Act of 1954, as amended.~~
- (i) Security Clearance. The Contractor may not permit any individual to have access to Restricted Data, Formerly Restricted Data, or other classified information, except in accordance with the Atomic Energy Act of 1954, as amended, and the Commission's regulations or requirements applicable to the particular type or category of classified information to which access is required. The Contractor shall also execute a Standard Form 312, Classified Information Nondisclosure Agreement, when access to classified information is required.
- (j) Criminal Liabilities. It is understood that disclosure of National Security Information, Restricted Data, and Formerly Restricted Data relating to the work or services ordered hereunder to any person not entitled to receive it, or failure to safeguard any Restricted Data, Formerly Restricted Data, or any other classified matter that may come to the Contractor or any person under the Contractor's control in connection with work under this contract, may subject the Contractor, its agents, employees, or subcontractors to criminal liability under the laws of the United States. (See the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011 et seq.; 18 U.S.C. 793 and 794; and Executive Order 12958.)
- (k) Subcontracts and Purchase Orders. Except as otherwise authorized in writing by the contracting officer, the Contractor shall insert provisions similar to the foregoing in all subcontracts and purchase orders under this contract.

- (I) In performing the contract work, the Contractor shall classify all documents, material, and equipment originated or generated by the Contractor in accordance with guidance issued by the Commission. Every subcontract and purchase order issued hereunder involving the origination or generation of classified documents, material, and equipment must provide that the subcontractor or supplier assign classification to all documents, material, and equipment in accordance with guidance furnished by the Contractor.

## 1.2 Information Technology Access Approval

The proposer/Contractor must identify all individuals and propose the level of Information Technology (IT) approval for each, using the following guidance. The NRC sponsoring office shall make the final determination of the level, if any, of IT approval required for all individuals working under this contract.

The Government shall have and exercise full and complete control over granting, denying, withholding, or terminating building access approvals for individuals performing work under this contract.

### Security Requirements for Level I

- Performance under this contract will involve prime Contractor personnel, subcontractors or others who perform services requiring direct access to or operate agency sensitive information technology systems or data (IT Level I).
- The IT Level I involves responsibility for the planning, direction, and implementation of a computer security program; major responsibility for the direction, planning, and design of a computer system, including hardware and software; or the capability to access a computer system during its operation or maintenance in such a way that could cause or that has a relatively high risk of causing grave damage; or the capability to realize a significant personal gain from computer access. Such Contractor personnel shall be subject to the NRC Contractor personnel security requirements of NRC Management Directive (MD) 12.3, Part I and will require a favorably adjudicated Limited Background Investigation (LBI).

A Contractor employee shall not have access to sensitive information technology systems or data until he/she is approved by Security Branch, Division of Facilities and Security (SB/DFS). Temporary access may be approved based on a favorable adjudication of their security forms and checks. Final access will be approved based on a favorably adjudicated LBI in accordance with the procedures found in NRC MD 12.3, Part I. However, temporary access authorization approval will be revoked and the employee may subsequently be removed from the contract in the event the employee's investigation cannot be favorably adjudicated. Such employee will not be authorized to work under any NRC contract without the approval of SB/DFS. Timely receipt of properly completed security applications is a contract requirement. Failure of the Contractor to comply with this condition within the ten work-day period may be a basis to void the notice of selection. In that event, the Government may select another firm for award. When an individual receives final access, the individual will be subject to a reinvestigation every 10 years.

The Contractor shall submit a completed security forms packet, including the SF-86, "Questionnaire for National Security Positions," and fingerprint charts, through the Project Officer to SB/DFS for review and favorable adjudication, prior to the individual performing work under this contract. The Contractor shall assure that all forms are accurate, complete, and legible (except for Part 2 of the questionnaire, which is required to be completed in private and submitted by the individual to the Contractor in a sealed envelope), as set forth in MD 12.3 which is incorporated into this contract by reference as though fully set forth herein. Based on SB review of the applicant's security forms

and/or the receipt of adverse information by NRC, the individual may be denied access to NRC facilities, sensitive information technology systems or data until a final determination is made of his/her eligibility under the provisions of MD 12.3. Any questions regarding the individual's eligibility for IT Level I approval will be resolved in accordance with the due process procedures set forth in MD 12.3 and E. O. 12968.

In accordance with NRCAR 2052.204-70 "Security," IT Level I Contractors shall be subject to the attached NRC Form 187 (See Section J for List of Attachments) which furnishes the basis for providing security requirements to prime Contractors, subcontractors or others (e.g., bidders) who have or may have an NRC contractual relationship which requires access to or operation of agency sensitive information technology systems or remote development and/or analysis of sensitive information technology systems or data or other access to such systems and data; access on a continuing basis (in excess of 30 days) to NRC Headquarters controlled buildings; or otherwise requires issuance of an NRC badge.

### **Security Requirements for Level II**

Performance under this contract will involve Contractor personnel that develop and/or analyze sensitive information technology systems or data or otherwise have access to such systems or data (IT Level II).

The IT Level II involves responsibility for the planning, design, operation, or maintenance of a computer system and all other computer or IT positions. Such Contractor personnel shall be subject to the NRC Contractor personnel requirements of MD 12.3, Part I, which is hereby incorporated by reference and made a part of this contract as though fully set forth herein, and will require a favorably adjudicated Access National Agency Check with Inquiries (ANACI).

---

A Contractor employee shall not have access to sensitive information technology systems or data until he/she is approved by SB/DFS. Temporary access may be approved based on a favorable review of their security forms and checks. Final access will be approved based on a favorably adjudicated ANACI in accordance with the procedures found in MD 12.3, Part I. However, temporary access authorization approval will be revoked and the employee may subsequently be removed from the contract in the event the employee's investigation cannot be favorably adjudicated. Such employee will not be authorized to work under any NRC contract without the approval of SB/DFS. Timely receipt of properly completed security applications is a contract requirement. Failure of the Contractor to comply with this condition within the ten work-day period may be a basis to void the notice of selection. In that event, the Government may select another firm for award. When an individual receives final access, the individual will be subject to a reinvestigation every 10 years.

The Contractor shall submit a completed security forms packet, including the SF-86, "Questionnaire for National Security Positions," and fingerprint charts, through the Project Officer to the NRC SB/DFS for review and favorable adjudication, prior to the individual performing work under this contract. The Contractor shall assure that all forms are accurate, complete, and legible (except for Part 2 of the questionnaire, which is required to be completed in private and submitted by the individual to the Contractor in a sealed envelope), as set forth in MD 12.3. Based on SB review of the applicant's security forms and/or the receipt of adverse information by NRC, the individual may be denied access to NRC facilities, sensitive information technology systems or data until a final determination is made of his/her eligibility under the provisions of MD 12.3. Any questions regarding the individual's eligibility for IT Level II approval will be resolved in accordance with the due process procedures set forth in MD 12.3 and E.O. 12968. In accordance with NRCAR 2052.204-70 "Security," IT Level II Contractors shall be subject to the attached NRC Form 187 (See Section J for List of Attachments) which furnishes the basis for providing security requirements to prime Contractors, subcontractors or others (e.g., bidders) who have or may have an NRC

contractual relationship which requires access to or operation of agency sensitive information technology systems or remote development and/or analysis of sensitive information technology systems or data or other access to such systems or data; access on a continuing basis (in excess of 30 days) to NRC Headquarters controlled buildings; or otherwise requires issuance of an NRC badge.

### **1.3 Cancellation or Termination of IT Access**

When a request for investigation is to be withdrawn or canceled, the Contractor shall immediately notify the Project Officer by telephone in order that he/she will immediately contact the SB/DFS so that the investigation may be promptly discontinued. The notification shall contain the full name of the individual, and the date of the request. Telephone notifications must be promptly confirmed in writing to the Project Officer who will forward the confirmation via email to the SB/DFS. Additionally, SB/DFS must be immediately notified when an individual no longer requires access to NRC sensitive automated information technology systems or data, including the voluntary or involuntary separation of employment of an individual who has been approved for or is being processed for access under the NRC "Personnel Security Program."

### **1.4 Badge Requirements for Unescorted Building Access to NRC Facilities**

During the life of this contract, the rights of ingress and egress for Contractor personnel must be made available, as required, provided that the individual has been approved for unescorted access after a favorable adjudication from the Security Branch, Division of Facilities and Security (SB/DFS). In this regard, all Contractor personnel whose duties under this contract require their presence on-site shall be clearly identifiable by a distinctive badge furnished by the NRC. The Project Officer shall assist the Contractor in obtaining badges for the Contractor personnel. It is the sole responsibility of the Contractor to ensure that each employee has a proper NRC-issued identification/badge at all times. All photo-identification badges must be immediately (no later than three days) delivered to SB/DFS for cancellation or disposition upon the termination of employment of any Contractor personnel. Contractor personnel must display any NRC issued badge in clear view at all times during on-site performance under this contract. It is the Contractor's duty to assure that Contractor personnel enter only those work areas necessary for performance of contract work, and to assure the protection of any Government records or data that Contractor personnel may come into contact with."

### **1.5 Security Requirements for Building Access Approval**

The Contractor shall ensure that all its employees, including any subcontractor employees and any subsequent new employees who are assigned to perform the work herein, are approved by the Government for building access. Timely receipt of properly completed security applications is a contract requirement. Failure of the Contractor to comply with this condition within the ten work-day period may be a basis to void the notice of selection. In that event, the Government may select another firm for award.

A Contractor employee shall not have access to NRC facilities until he/she is approved by Security Branch, Division of Facilities and Security (SB/DFS). Temporary access may be approved based on a favorable adjudication of their security forms. Final access will be approved based on favorably adjudicated background checks by General Services Administration in accordance with the procedures found in NRC Management Directive 12.3, Part I. However, temporary access authorization approval will be revoked and the employee may subsequently be removed from the contract in the event the employee's investigation cannot be favorably adjudicated. Such employee will not be authorized to work under any NRC contract without the approval of SB/DFS. When an individual receives final access, the individual will be subject to a reinvestigation every five years.

The Government shall have and exercise full and complete control over granting, denying, withholding, or terminating building access approvals for individuals performing work under this contract. Individuals performing work under this contract shall be required to complete and submit to the Contractor representative an acceptable GSA Form 176 (Statement of Personal History), and two FD-258 (Fingerprint Charts). Non-U.S. citizens must provide official documentation to the DFS/SB, as proof of their legal residency.

This documentation can be a Permanent Resident Card, Temporary Work Visa, Employment Authorization Card, or other official documentation issued by the U. S. Citizenship and Immigration Services. Any applicant with less than two years residency in the U. S. will not be approved for building access. The Contractor representative will submit the documents to the Project Officer who will give them to the SB/DFS. SB/DFS may, among other things, grant or deny temporary unescorted building access approval to an individual based upon its review of the information contained in the GSA Form 176.

Also, in the exercise of its authority, GSA may, among other things, grant or deny permanent building access approval based on the results of its investigation and adjudication guidelines. This submittal requirement also applies to the officers of the firm who, for any reason, may visit the work sites for an extended period of time during the term of the contract. In the event that SB/DFS and GSA are unable to grant a temporary or permanent building access approval, to any individual performing work under this contract, the Contractor is responsible for assigning another individual to perform the necessary function without any delay in the contract's performance schedule, or without adverse impact to any other terms or conditions of the contract.

The Contractor is responsible for informing those affected by this procedure of the required building access approval process (e.g., temporary and permanent determinations), and the possibility that individuals may be required to wait until permanent building access approvals are granted before beginning work in NRC's buildings.

The Contractor will immediately notify the Project Officer when a Contractor employee terminates. The Project Officer will immediately notify SB/DFS (via e-mail) when a Contractor employee no longer requires building access and return any NRC issued badges to the SB/DFS within three days after their termination.

## **J. PERFORMANCE BASED STATEMENT OF WORK**

Project Title: Contract Resource Estimate To Support Sensitive Information Reviews, Phase II

### Background

The Nuclear Regulatory Commission (NRC) staff developed guidance for handling sensitive unclassified information that could reasonably be expected to be useful to a potential adversary, as part of the Security-Related Sensitive Unclassified Non-Safeguards Information (SUNSI) effort. This guidance was provided to the Commission in SECY 05-0101, "Withholding From Public Disclosure Sensitive Unclassified Information Concerning Material Licensees and Certificate Holders," on June 8, 2005. The Commission Staff Requirements Memorandum (SRM) was issued on October 7, 2005. NRC issued its criteria in Regulatory Information Summary (RIS) 2005-31, "Control of Security-Related Sensitive Unclassified Non-Safeguards Information Handled by Individuals, Firms, and Entities Subject to NRC Regulation of the Use of Source, Byproduct, and Special Nuclear Material," on December 22, 2005. Since the NRC is returning many documents that were previously removed from public access back to the public domain, contractor assistance

is required with the screening and the redaction of documents prior to the transfer. Redaction services began in the summer of FY06. The sensitive information review of documents will be completed under this contract. Documents containing proprietary information will remain not publicly available.

### Objective

The objective of this contract is to obtain technical assistance for the Division of Spent Fuel Storage and Transportation (SFST) staff with screening documents related to SUNSI reviews prior to them being made available to the public.

### Scope of Work

SFST intends to restore documents docketed under 10 CFR Part 71 and Part 72 to the public domain after they have been screened against the criteria contained in RIS 2005-31. To assist SFST in meeting this objective, the contractor shall perform the work requirements described under Tasks 1 and 2 below. Two optional tasks are also included since the NRC may require further document redaction and review services later this calendar year. If the optional tasks are needed, the services will be initiated via a modification to the contract and the contractor will be notified at least 20 days prior to the issuance of the modification.

All documents are contained in a NRC electronic library and redacted versions will be in a pdf format. For all tasks, the contractor shall review documents that potentially contain Official Use Only, Proprietary, and other types of sensitive information within the Agency wide Documents Access and Management System (ADAMS) document system. Therefore, the contractor shall ensure that documents are handled in accordance with Management Directive 12.6 - NRC Sensitive Unclassified Information Security Programs. The contractor shall have a program in place that can assure that high quality products are provided.

#### Task 1 - Screen 10 CFR Part 72 Historical Documents and Identify SUNSI Material

Under this task, the contractor shall sort documents in the 10 CFR Part 72 docket that may contain information identified under the SUNSI requirements. The dockets shall be reviewed and sorted using a variety of sorting techniques including keyword searches and others identified by the TPM. There are approximately 17,000 documents to be reviewed and sorted into electronic files.

#### Task 2 - Review of Documents Associated with Staff Information Needs and Department of Justice Discovery Requests or FOIA Requests

The contractor shall review documents in the 10 CFR Part 71 and Part 72 dockets that are associated with discovery or staff requests for new and on-going litigation. Since these services will be performed on an as-needed basis, the TPM will notify contractor staff via email of any review necessary.

#### Optional Task 3 - Provide Redaction Services to Support Restoration of Part 72 Dockets

Under this optional task, the contractor shall redact documents identified in Task 1 that include information that meets the SUNSI requirements. Documents requiring redaction will be reviewed individually for SUNSI information. For documents containing SUNSI information, a new redacted version of the document shall be created in a pdf format with key information being noted as removed. The results will be a new redacted version of each document.

There are approximately 1700 documents to be redacted in this library with an average page count of 300 per document. It is estimated that approximately 10 percent of those pages will require redaction.

Optional Task 4 - Provide Screening and Redaction Services for Recent Documents Identified by SFST Staff for Licensing Actions

This optional task includes documents in both the 10 CFR Part 71 and Part 72 dockets that will require review and redaction. These documents will be identified by the TPM on an as-needed basis. Generally, a two week turn around on these documents will be requested. It is estimated that there will be 20 documents per month with an average page count of approximately 200. Staff estimates that 10 percent of the pages will require redaction.

Personnel Qualifications

The contractor staff must be knowledgeable concerning the requirements of the SUNSI process and the criteria contained in RIS 2005-31. Personnel performing under this contract shall possess a Level II IT security clearance because they will view documents that contain Official Use Only, proprietary material and other sensitive material. Personnel should have a good understanding of the review criteria and be able to apply it appropriately. Additionally, personnel should have a good working knowledge of ADAMS and Adobe Acrobat which is the software required to create redacted versions of documents. All personnel will be required to sign a non-disclosure agreement.

Level of Effort

The level of effort estimated for the tasks are provided below. Costs for the optional tasks should be noted separately in a proposal since only work required under Tasks 1 and 2 is to begin after contract award.

---

Task 1	0.15 FTE
Task 2	0.07 FTE
Optional Task 3	0.35 FTE
Optional Task 4	0.1 FTE

Period of Performance

The period of performance for the work specified in this sow shall begin on the date of execution of the contract and is expected to continue through March 31, 2008.

Deliverables & Anticipated Schedule

The required deliverables with the anticipated schedule are indicated below and are to be provided to the TPM.

Task 1 - Tabulation of 10 CFR Part 72 documents that contain SUNSI criteria material is due within four weeks of contract initiation.

Task 2 - Screening and redaction services of documents required by staff for information needs and discovery requests are due within two weeks of the request.

Optional Task 3 - Redaction of 10 CFR Part 72 documents - To be determined.

Optional Task 4 - Screening and redaction services of documents for Part 71 and Part 72 dockets requested by the TPM - To be determined.

On a monthly basis, the TPM shall be provided with a listing of all sorted dockets and redacted documents.

#### Meetings and Travel

To accomplish the work described under the tasks above, only limited travel to the NRC Headquarters office is anticipated. Approximately one meeting per month will be necessary.

#### NRC Furnished Materials

The NRC TPM will provide the contractor with copies of relevant documents through access to ADAMS.

#### Technical Direction

The NMSS TAPM is the focal point for all contract-related activities. All work assignments and program funding actions are initiated by the NMSS TAPM who submits all requests to the Division of Contracts (DC) for processing. All proposed work scope or schedule changes must be submitted through the NMSS TAPM for DC.

The designated NMSS/SFST TPM is responsible for providing technical guidance to the contractor. All work products must be reviewed and approved by the TPM before they are submitted as final documents. All technical direction given to the contractor must be consistent with the scope of work and schedule. The NMSS TPM is not authorized to unilaterally make changes to the approved work scope or schedule or give the contractor any direction that would increase cost over approved levels. The DC Contracting Officer is the only individual authorized to make changes to this contract.

---

#### Monthly Financial and Technical Status Reports

The contractor shall submit monthly technical and financial status reports and contractor spending plans in accordance with the requirements specified in NRCAR 2052.212-71 and 2052.212-72.
