MEMORANDUM TO: William D. Reckley, Branch Chief
Guidance, Infrastructure and Financial Review Branch
Division of New Reactor Licensing
Office of New Reactors

FROM: Serita Sanders, Project Manager */RA/*
Guidance, Infrastructure and Financial Review Branch
Division of New Reactor licensing
Office of New Reactors

SUBJECT: SUMMARY OF MAY 22, 2007, LIMITED WORK AUTHORIZATION
PUBLIC MEETING

On May 22, 2007, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 2 public meeting to solicit feedback from stakeholders on the development of the new limited work authorization (LWA) guidance. A list of attendees is attached. The NRC led the discussion by giving the background of rulemaking and explaining the genesis of the proposed rule and all of the changes leading up to the final rule. The final rule was provided as an attachment to SECY-07-0030 dated 02/07/2007. New LWA provisions were explained from both the safety and environmental perspective.

The NRC staff will include the application guidance in Regulatory Guide (RG) 1.206 and review guidance in an LWA review standard for the safety portion. Guidance for the environmental report will be put in supplements to RG 4.2 and the Environmental Standard Review Plan. Once the guidance has been completed, it will be posted on NRC's web-site for stakeholders to review and provide comments. Further, a Category 3 public meeting will be held, if deemed necessary after reviewing preliminary comments, to resolve any remaining questions.

Enclosure:
As stated
