Subject: IPEC status report for March 8

Please see attached.

Kathy McMullin

Indian Point Energy Center Status Report

March 7 2007

Operational Status – Indian Point begins 3R14

IP3 operators safely and successfully shutdown the unit this morning starting 3R14, the plant's fourteenth refueling outage. Following the reactor shutdown, operators cooled down the reactor coolant system to less than 200 degrees.

IP3 had a successful run, which included 228 days of continuous operation and a record high net electrical generation for 2006.

Significant activities during 3R13 include the replacement of 96 of the 193 fuel assemblies, reactor vessel head inspection. Vapor Containment sump modifications, and steam generator inspections as well as routine surveillance and preventive maintenance tasks.

Pictured above is a reactor coolant pump being lifted at IP3. Maintenance on the reactor coolant pumps, which circulate water around the reactor core, is a major focus of 3R14.

Unit 2 is operating at 100% and has been on-line for 7 days.

Educational Outreach

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
