**Edwin I. Hatch Nuclear Plant**  
**Supplemental Information - Security Order EA-06-137**

Ladies and Gentlemen:

By letter dated June 20, 2006, the NRC issued the subject Order. Subsequently, the NRC determined that instead of incorporating the required strategies into the Edwin I. Hatch (Hatch) Security Plan, amending the operating license with a license condition would be sufficient to satisfy the Order's substantive regulatory requirements. Accordingly, the NRC proposed a license condition in its August 28, 2006, letter that would satisfy the Order's requirements. By letter dated October 11, 2006, Southern Nuclear Operating Company (SNC) provided concurrence with the proposed modification to the Hatch Unit 1 and Unit 2 operating licenses to incorporate the requirements of the Order.

This letter advises the NRC that Hatch procedures and initial and recurring operating staff training programs include the key radiological protection mitigation strategies identified in Attachment 2 to the enclosure of NRC letter dated June 20, 2006.

(Affirmation and signature are provided on the following page.)
