Date: 06/20/2007 1:48:48 PM
Subject: Spill Report

Steve,

A spill of injection fluid was reported at 12:30 in Wellfield K, HH-5, yesterday, June 20, 2007. The spill resulted as an operator was backing up a Smeal Truck to connect to a Water Trailer. The water tank was breached during the process, releasing approximately 840 gallons from the tank to the ground. All pooled solutions were recovered with a vacuum truck and disposed of in PRI's evaporation pond. The uranium concentrations of the solutions were 41.2 ppm and the effected ground will be removed and disposed of at our licensed disposal site. This spill did not enter nor threaten the waters of the State. As standard practice, Mr. Joe Hunter of WDEQ/WQD was notified by phone.

Regards,

John McCarthy
