Results of the Unit 2 online OPRM testing were submitted to the NRC on December 15, 1998, along with a description of the principal system parameters that were adjusted. The same changes were made for Unit 3 prior to enabling the system. Unit 3 results for online OPRM testing was submitted to the NRC on May 25, 2000.

Unit 1 Technical Specifications (TS) changes required for enabling the OPRM were provided in a submittal dated January 6, 2006 (BFN TS-443). NRC approved the OPRM TS on December 29, 2006, as Amendment No. 266 to the Unit 1 Facility Operating License (TAC No. MC9565).

The OPRM has been enabled for the current cycle of operation. OPRM testing and required surveillance tests were satisfactorily completed, and the OPRM system is in service and enabled. Therefore, TVA considers the commitment to provide a long-term stability solution completed for Unit 1. This completes the actions required for Generic Letter 94-02, Long-Term Solutions and Upgrade of Interim Operating Recommendations for Thermal-Hydraulic Instabilities in Boiling Water Reactors, for Unit 1.

There are no new commitments in this letter. If you have any questions, please contact me at (256) 729-2636.

Sincerely,

Original signed by:

W. D. Crouch  
Manager of Licensing  
and Industry Affairs
