Docket 52-001

June 18, 2007

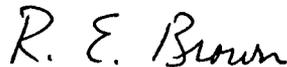

Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

SUBJECT: Advanced Boiling Water Reactor Design Control Document

Currently, GE-Hitachi Nuclear Energy Americas is preparing an electronic submittal of the Advanced Boiling Water Reactor ("ABWR") Design Control Document ("DCD"). We plan to perform a quality verification of the electronic version of Revision 4 of the DCD, which is incorporated by reference in the ABWR design certification rule 10 CFR Part 52, Appendix A. Accordingly, we request that the NRC approve GE-Hitachi Nuclear Energy Americas obtaining a complete copy of the DCD, Revision 4, and the associated drawings on aperture cards from the Public Document Room without NRC removal of the sensitive unclassified non-safeguards information. We plan to submit an order through the Public Document Room for one or more copies of the DCD and the drawings

If you have questions, please contact Patricia Campbell, Director, Washington Regulatory Affairs, at 202-637-4239.

Sincerely,

Robert E. Brown
