Subject: UniStar Nuclear, NRC Project No. 746
Early Submittal of the Environmental Report

- References:
- 1) Letter UN#07-001, from R. M. Krich to U.S. Nuclear Regulatory Commission, "UniStar Nuclear, NRC Project No. 746, Review of Current Plans," dated February 16, 2007
 - 2) Letter UN#07-004, from R. M. Krich to U.S. Nuclear Regulatory Commission, "UniStar Nuclear, NRC Project No. 746, Notification of Site Selection," dated April 30, 2007

As early as January 25, 2006, UniStar Nuclear had informed the NRC of its plans to submit the Environmental Report (ER) portion of the reference Combined License (i.e., COL) application for a US EPR in June 2007. Our letter dated February 16, 2007 (Reference 1) provides a recounting of all the occurrences of when UniStar Nuclear reiterated its intention to submit the ER in June 2007. The latest statement of our intention to submit the ER in June 2007 based on the Calvert Cliffs Nuclear Power Plant site was our letter dated April 30, 2007 (Reference 2).

This letter is to notify the NRC that the ER will now be submitted no later than July 13, 2007. This extra time is being taken to make sure that the ER submitted to the NRC meets UniStar Nuclear standards.

If you have any questions or need additional information, please contact me at (410) 864-6441.

Respectfully,

A handwritten signature in black ink, appearing to read "R. M. Krich".
