Subject: spill info.

Steve,

During the inspection of the spill of 6/22/07 reported to you on Friday 22, 2007 and mapping the extent of the effected area we have located and repaired an additional discharge point. HP-397. A brass nipple had corroded and was contributing the reported leak. We have determined that this well may have contributed an additional 3747 gallons to the original reported event.

Regards,

Jhn McCarthy
