Subject: Pending RGRC Uranium License Application

To: Ronald C. Linton, Uranium Recovery Licensing Branch, FSME, NRC

Dear Mr. Linton:

Thank you for accepting my recent calls regarding the pending source material license application at the Rio Grande Resources Corporation (RGRC) facility near San Mateo, New Mexico. RGRC has secured the consulting services of my company, Trinitek Services, LC to assist them in completing the necessary licensing and permitting requirements to open its ion exchange plant and subsequently the uranium mill.

As you are aware, the first license from NRC will be used to remove soluble uranium from the mine discharge water. On or about July 23, 2007, RGRC will be submitting a letter of intent (LOI) to the Uranium Recovery Recovery Branch of NRC declaring their intent to file a license application in early Fall 2007 for the purpose of operating the IX plant. The LOI will provide an estimated date of the application submittal plus a summary of the anticipated path forward.

It will be our pleasure to work with you and the staff of licensing branch in the upcoming months. If you have any questions or comments, please feel free to give me a call. Thank you again.

Sincerely,

Stanley A. Fitch, CHP, RRPT
Vice-President
