Subject: Fwd: SUA-1350 - Monitor Wells - Sweetwater Uranium Project

Please Docket in Kennecott.

>>> "Paulson, Oscar (RTEA)" <Oscar.Paulson@riotinto.com> 06/24/2007 2:46 PM >>>

Stephen Cohen: As of Wednesday, June 13, 2007 the six (6) (three (3) pairs) of monitor wells described in the Annual Corrective Action Program (CAP) Review were installed and completed. The water has been sampled and the samples sent for analysis. Results are pending. The six (6) wells were completed in the approximate locations described in the review and completed at the depths described in the review. In addition, soil samples were collected every five (5) feet during the course of drilling from the surface to the water table. These samples have been sent for analysis. Results are pending. A section of core was cut in two (2) of the wells at the water table for detailed analysis. Results are pending. Preparations are being made to install at least one (1) dug well in the bottom of the diesel contaminated soil excavation and complete it so that it samples approximately the same zone as TMW-73.
