SUBJECT: FEE RECOVERABLE CHANGES TO RIO GRANDE RESOURCES FOR ISSUES
RELATED TO LICENSING OF A CONVENTIONAL URANIUM MILL (TAC J00524)

Dear Mr. Lister:

As you are aware, the U.S. Nuclear Regulatory Commission (NRC) is a fee recoverable agency. The NRC staff has determined that a technical assignment control (TAC) number should be opened so that staff time devoted to pre-application issues can be appropriately charged to Rio Grande Resources, consistent with the requirements of 10 CFR 170.12(b)(iii), and 10 CFR 170.31(12). Accordingly, a TAC number is being opened related to a prospective new conventional uranium mill associated with the Mount Taylor Mine.

If you have any questions regarding this letter or the enclosure, please contact Ron C. Linton, Project Manager, at (301) 415-7777, or by e-mail, to rcl1@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice for Domestic Licensing Proceedings and Issuance of Orders," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/
