To Whom It May Concern,

This letter is to request an amendment to our radioactive materials license as follows:

Please add Dr. Robert Ivker to our radioactive materials license as an authorized user for the following byproduct material groups 35.400; Iridium 192 for uses in a High Dose Rate Remote Afterloader Unit and Iodine 125 for use in the GliaSite RTS System.

Dr. Ivker is currently an authorized user for these specific items on license number 29-00102-07 at Newark Beth Israel medical Center. Dr. Ivker will be the covering physician for a brachytherapy case that is currently planned for July 13, 2007 therefore we would like this request this amendment be expedited so patient care is not compromised.

Any questions regarding the above matter should be directed to Linda Veldkamp at 908-994-8751. Thank you.

Sincerely,

Linda Veldkamp, MS, DABR
Chief Physicist/ Radiation Safety Officer
