Subject: RAI, Amendment Requests

(NOTE: This will be used as the Documents Title in ADAMS)

Summary: Do you need Ni-63 any longer in the "any" form? No, please delete this item. There are no unsealed Ni-63 at this time. The addition of hydrogen 3 in "any" form will require financial assurance. Are these registered sources being returned? Yes, they are registered by the sealed source and device registry (SS&D). We are recommending based on your amendment request that the following authorized uses be added to A & E: analysis and measurement. To C through F: Receipt of returned devices for refurbishment or disposal. That would be good. Who would be the users for the returned sources? They would be group 1 of the training letter of September 11, 2002. Is there any new locations for this material. No, the returned material would be stored in cans, awaiting disposal. I also discussed the need for decommissioning records associated with any unsealed Ni-63 sources. This would be an opportune time to document all uses of unsealed Ni-63, locations, and surveys associated with locations of use.

On the General License distribution, the amendment will need to wait until the requested changes to the SS&D are completed. Also, are you redistributing the additional sources that are no longer manufactured? Yes, they are being redistributed.

Action Required: Will send in the SS&amp;D information on sealed sources. Will send in commitment for training requirement.
