Subject: Amendment to License No. 07-30728-01
Reference Mail Control Number: 140592

Dear Mr. Lawyer:

Per our conversation, on June 21 & July 2, 2007 Incyte Corporation, located at DuPont Experimental Station, buildings E336 and E400, Route 141 & Henry Clay Road, Wilmington, Delaware would like to as requested in the May 29, 2007 amendment letter continue with the removal of the facilities located at 1090 Elkton Road, buildings 112 and 115, Newark, Delaware from our NRC license 07-30728-01. Incyte no longer leases or operates in these facilities. The facilities have been decommissioned by RSO, Inc. and are returned to the E.I. du Pont de Nemours and Company. A copy for the decommissioning report was enclosed in the May 29, 2007 letter. Incyte understands this request will be handled under a separate action from the permit limit amendment request that follows.

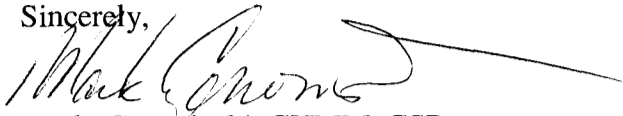

Also, per our conversation Incyte Corporation would like to withdraw the amendment request in the May 29, 2007 letter to increase our NRC license 07-30728-01 limit for Carbon 14 from the current 50 millicurie limit to 300 millicuries. Instead, Incyte would

140762
NMSS/RGN1 MATERIALS-002

like to increase our NRC license 07-30728-01 limit for Carbon 14 limit from 50 millicuries to 85 millicuries and lower the limit for Hydrogen 3 from 300 millicuries limit to 150 millicuries. As discussed on the June 21 and July 2, 2007 this increase in license limit requested does not exceed the limits set forth in 10 CFR 30.35 requiring Financial Assurance and Recordkeeping for Decommissioning. Incyte is not required to maintain financial assurance certification for our current permit limits. Also, our Hydrogen 3 inventory has never exceeded 150 millicure's during our permit history.

If you require additional information please contact me at 302-498-6827 or by e-mail at mczerwinski@incyte.com .

Sincerely,

Mark Czerwinski, CHMM, CSP
RSO/Environmental Health & Safety Engineer

Dear Mr. Lawyer:

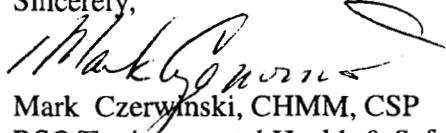

Incyte Corporation, located at DuPont Experimental Station, buildings E336 and E400, Route 141 & Henry Clay Road, Wilmington, Delaware would like to remove the facilities located at 1090 Elkton Road, buildings 112 and 115, Newark, Delaware from our NRC license 07-30728-01. Incyte no longer leases or operates in these facilities. The facilities have been decommissioned by RSO, Inc. and are returned to the E.I. du Pont de Nemours and Company. A copy for the decommissioning report is enclosed.

140762 [Also, Incyte Corporation would like to amend our NRC license 07-30728-01 limit for Carbon 14 from the current 50 millicurie limit to 300 millicuries. As the company prepares for potential future FDA submissions we would like to be in position to prepare for additional research studies as potential drug candidates progress in the approval process. The increase in license limit requested does not exceed the limits set forth in 10 CFR 30.35 requiring Financial Assurance and Recordkeeping for Decommissioning.]
