~~***** Proprietary Information *****~~

Thanks Bruce-
 I will pass this along to security. Also Geoff Wertz should have faxed you a copy of the mass balance charts.

I understand that you and Larry Hall are working out a date for you to talk to a few people on the Additional Protocol. The next IAEA inspection has been mentioned (8/24-26) as a possibility. While you are here you may want to get scheduled for the General Employee Safety training (GEST). It is required for unescorted access to controlled areas and both your and Brian's training has expired. The IAEA has also informed us that the September inspection will be September 28-30. Both the UZOO PIT and PIV are scheduled for the morning of the 28th. BWX will be conducting its semi-annual inventory at the same time. UZOO will be closing out its material balance period at that time.

Don

Don,

The daily declaration disks arrived and are awaiting me to retrieve them.

In response to your question regarding mailing the BWXT disks to NRC, 10 CFR 95.39(c)(2) states "Confidential matter may be transported ... by U.S. express or certified mail."

10 CFR95.39(c)(1) states "Secret matter may be transported only by one of the following methods ... (i) U.S. Postal Service Express Mail and U.S. Postal Service Registered Mail."

Bruce
