IAEA Activities at the BWXT Down Blending Facility
July 5, 2001 – July 11, 2001

Inspectors from the International Atomic Energy Agency (IAEA) will be at the BWX Technologies (BWXT) Down Blending Facility July 5, 2001 – July 11, 2001 to perform the monthly interim inventory verification (IIV) and inspection as well as install/calibrate their equipment upon completion of the scheduled maintenance (repiping) during the plant shutdown.

Training Information

Gabriel Bernasconi, Pantelis Ikonou, Benjamin Torres-Barrios, Wolf Dieter Sellingschegg, Junichi Tanaka and Christian Reder have completed the required radiological and safety training that is required annually. All except Gabriel Bernasconi will be reviewing the Security Awareness training since it has been revised. Brian Horn's training is also up to date. No further training will be necessary.

Follow up items from last inspection

- The problem with the authenticator will require another authenticator be purchased and replace the current one. Software will either be E mailed to BWXT or brought at an upcoming inspection.
- BWXT will continue with investigating the future use of the shipping container in the IAEA trailer to be used for samples pulled during inspections to be sent to the IAEA in Vienna. Preston Foster will communicate with Mr. A. Hamos on this issue.

• (b)(4)

presented to the Agency a timetable and diagram of this work during this inspection. The coordination of this work with a Panometrics technician was discussed during the inspection as well as when the inspectors would return to place their equipment back on line. It was decided the inspectors and Panometrics technician would return on July 5th for this work and plan to stay until July 11th if needed.

- BWXT received a "request for quotation" form to be completed for the air conditioner to be purchased for the Agency cabinet.
- The one daily declaration disk containing the last batch for the June inspection was sent to DOD on June 21st and arriving on the 22nd and sent to Vienna on Monday June 25th.
- BWXT is reviewing Robert's September paper and will forward comments as soon as possible.

Follow up items since last inspection

- The 49 IAEA contaminated seals to be shipped to Vienna has been completed. The seals were packaged for shipment through Trans Nuclear and were Fed Ex from Lynchburg on Friday June 22nd. The package was to leave from Kennedy airport in New York on Saturday June 23rd.

• (b)(4)

- BWXT sent a FAX to NRC/IAEA that confirms plans to update the DIQ upon completing the piping changes. IAEA comments (unofficial) are currently being reviewed by BWXT for this revision as well.
