**IAEA Activities at the BWXT Down Blending Facility
April 09, 2003 – April 11, 2003**

Inspectors from the International Atomic Energy Agency (IAEA) will be at the BWX Technologies (BWXT) Down Blending Facility April 09, 2003 – April 11, 2003 to perform the interim inventory verification (IIV) and inspection.

Training Information

Inspectors (Pantelis Ikononou and Ok-Seok Seo) have reviewed the latest version of the Security Awareness training. Brian Horn with the NRC will be present during this inspection. All IAEA escort personnel entering the Downblend area by way of the roll-up door on the south end of Downblend are required to be trained to procedure OP-1009440 (IAEA Entrance to Downblend Area) prior to entering the area. No further training will be necessary.

with
info

- Operations completed a re-calibration of Blend tank - 2 on March 25. Cheryl has completed revising the variances for BT-2 with the DIQ effected page being updated. Attached are the revised variances for the blend tank for IAEA inspector information.
- BWXT received notification from IAEA (March 28) and the Broker in NY (March 26) of the shipment of an NAID Detector Standard scheduled to arrive in NY on March 27. Shipment has arrived in U.S. and awaiting DS 15 04 form to be cleared by United Nations. Ms. Ricker with the UN Procurement office stated paper work could have been started prior to shipment to speed things up in the future. Updates will be documented and IAEA notification of receipt will be confirmed.
