TOTAL CARRIED FORWARD TO 1ST PAGE (ITEM 17(H))

\$359,890.00

ADDITIONAL TASK ORDER TERMS AND CONDITIONS**CONSIDERATION AND OBLIGATION**

(a) The total estimated amount of this contract (ceiling) for the products/services ordered, delivered, and accepted under this contract is \$359,890.00. The Contracting Officer may unilaterally increase this amount as necessary for orders to be placed with the contractor during the contract period provided such orders are within any maximum ordering limitation prescribed under this contract.

(b) The amount presently obligated with respect to this contract is \$359,890.00. The Contracting Officer may issue orders for work up to the amount presently obligated. This obligated amount may be unilaterally increased from time to time by the Contracting Officer by written modification to this contract. The obligated amount shall, at no time, exceed the contract ceiling as specified in paragraph a above. When and if the amount(s) paid and payable to the Contractor hereunder shall equal the obligated amount, the Contractor shall not be obligated to continue performance of the work unless and until the Contracting Officer shall increase the amount obligated with respect to this contract. Any work undertaken by the Contractor in excess of the obligated amount specified above is done so at the Contractor's sole risk.

FileNET Professional Services Task Order #7
"Technical Customization and Integration Support"
Statement of Work

1 Background

NRC's Agencywide Documents Access and Management System (ADAMS) was developed using the FileNET™ suite of products (Commercial Off-the-Shelf package), integrated with the ForeMost™ records management product to provide both document management and record management functionalities required by the agency.

2 Objective

It is projected that starting from 3rd Quarter of 2007 the number of Combined Operating License Applications (COLA) for construction of new nuclear power plants and license renewal applications for existing power plants will dramatically increase. ADAMS is the center to the effective processing of all the licensing and re-licensing activities. To extend the current functionality of ADAMS to support the agency's requirements, there is an urgent need for some immediate enhancements and customizations. This Task Order will address some of the most pressing issues and required customizations.

2.1 ADAMS Overview

NRC ADAMS (Agencywide Documents Access and Management System) is a customized Document Management System, with a FileNET™ Integrated Document Management (IDM) foundation. It is comprised of a Distributed IDM Document Services (IDMDS) System with two WAN Nodes, Headquarters and Public. One-way replication is enabled across a firewall that separates the -two nodes; three internally accessible Headquarters Libraries replicate to two Public Libraries, which are externally assessable via the Internet by means of Citrix MetaFrame or by Convera's RetrievalWare (web-based) product.

3 Scope of Work

3.1 Customization and Integration Support

Customization and integration support in extension of what is covered under the Annual Licensing Agreement. The scope includes extension of the functionality of the ADAMS through customization of the existing FileNET™/ADAMS Platform and Libraries, and support of the new customized code as articulated below:

- Provide the full customization and integration support of the main FileNet™ platform, FileNet™ custom code, base code and installation of new parts to enhance secured access to the ADAMS main and public libraries using the new standard FileNet technologies.
- Customization/enhancement of the existing ADAMS platform to integrate with MS Office and MS Outlook and provide necessary support, system configuration and problem resolution/troubleshooting support.
- Open and resolve cases with IBM/FileNET™ on behalf of the NRC.
- Serve as NRC's technical contact to IBM/FileNET™ for resolution of cases.

3.2 Research and Development

IBM/FileNET will provide expertise for the efforts associated with developing new technology solutions that will incorporate any of the associated products within the FileNET™ Suite. This will include providing support for determining integration requirements and mapping to new products that are introduced into the current configuration.

3.3 Planning Input

The Contractor shall provide consulting services to advise the NRC on the appropriate hardware configuration for NRC FileNET™ platform.

4 Travel

The contractor shall travel to NRC headquarters in Rockville, MD as required to perform work that requires a physical presence at the NRC.

5 Period of Performance

July 1, 2007 through December 31, 2008

6 Deliverables and Delivery Schedule

- Weekly Status Reports - Weekly on Wednesday
- Monthly Status Reports - Monthly on 7th Business Day
- Ad Hoc/Migration Analysis Reports - As Required by Mutual Agreement
- Software Tests on Units, Modules, and Subsystems - As Required by Specific Task Order
- Software Configuration Update Reports - As Required by Specific Task Order

7 Personnel

All staff performing activities directly related to the implementation of the requirements of the SOW must have appropriate levels of experience with the FileNET™ software product suite, Windows XP, Windows 2000 Server, Windows 2003 Server, SQL Server, Windows SharePoint Server, IIS and other software foundations required to implement FileNet™ based solutions.

8 Government Furnished Items

The Government will provide the following:

- For scheduled meeting dates, conference rooms will be reserved for contractor use. Each of these rooms has a telephone available for use.
- For contractors working in Government office space, desks with telephones and networked computers will be provided for use.
