RAI 21.6-88, Supplement No. 3 ,(MFN-06-467 Supplement 2, 6/13/07)

The staff requires additional explanation of the supplemental information provided in RAI response 21.6-88 S02 to complete the review.

- A. The LTR update should include both the first and the third sentence of paragraph one of the response, as opposed to the first sentence only.
- B. The response does not indicate which of the available techniques was used for the ESBWR; therefore, while the staff understands that either method may have been used, the staff does not understand which one was employed for the analyses of record.
- C. The staff does not understand the terms in the equation involving the quantity $[\Delta \text{ }]$. The term $[\Delta \text{ }]$ appears to the staff to be the $[\Delta \text{ }]$ while the response refers to this quantity as the $[\Delta \text{ }]$. The staff finds that the terminology appears to be inconsistent. However, upon substituting the expression for $[\Delta \text{ }]$ into the equation listed under item 1 in the RAI 21.6-88 S01 response the staff finds that the quantity $[\Delta \text{ }]$ is the $[\Delta \text{ }]$.

In the LTR update include the mathematical expression for $[\Delta \text{ }]$ with the other information to be included as part of item 1 in the RAI 21.6-88 S01 response, and a clarification of what is meant by $[\Delta \text{ }]$.
