CERTIFIED MAIL
RETURNED RECEIPT REQUESTED

Mr. Steven D. Landau
Manager, Environmental Affairs
Denison Mines Corp (DUSA)
Independence Plaza, Suite 950
1050 Seventeenth Street
Denver, CO 80265

**SUBJECT: Chloroform Groundwater Contamination Investigation (CI), White Mesa Uranium Mill
Near Blanding, Utah, - Conditional Approval for Modification to the Ground Water
Monitoring Quality Assurance Plan (QAP) for the Chloroform Monitoring Wells.**

Dear Mr. Landau:

The Division of Radiation Control (DRC) has reviewed the DUSA February 8, 2007 letter (DUSA 2007) that was submitted concerning modifications to the QAP for the sampling of the chloroform monitoring wells that are monitored for the chloroform CI. Based on our review the DRC has approved the modifications to the QAP with the following conditions:

1. Modify the QAP to include an Appendix for Chloroform Investigation Monitoring.
2. Modify section 6.2.1, *Location and Frequency of Groundwater Compliance Monitoring*, of the QAP to include a reference to the above Appendix for Chloroform Investigation Sampling Frequency and Locations (Item 2 of DUSA 2007).
3. Modify section 6.2.8, *Samples to be Taken and Order of Taking Samples*, of the QAP to include a reference to the above Appendix for Chloroform Investigation Sample Containers and Collection Volume (Item 3 of DUSA 2007).
4. Modify section 8.2, *Analytical Laboratory Procedures*, of the QAP to include a reference to the above Appendix for laboratory Requirements (Item 4 of DUSA 2007).

In our phone conversation on June 29, 2007, it was agreed that on July 16, 2007 DUSA will submit revised QAP in a redline - strikeout format, a final version, and an electronic copy of the final version of the QAP
