- **Proceedings:** NYSG's Hard Clam Population Dynamics Initiative (1999)

At Danford's on February 26, 1999, New York Sea Grant, the South Shore Estuary Reserve Council and the NYSDEC sponsored a *Workshop on Hard Clam Population Dynamics-Research Priorities for the South Shore of Long Island*. This session provided a forum where knowledgeable individuals could define and discuss what is known and what needs to be known about hard clam population dynamics as applicable to restoring and enhancing the dwindling hard clam resource and its fishery. With research goals in focus, New York Sea Grant will administer \$450,000 in hard clam research funds from NOAA's National Marine Fisheries Service after a recent appropriation initiated by Congressman Michael Forbes.

For a hard copy of the rough transcript for this workshop, please contact Cornelia Schlenk at New York Sea Grant (631-632-6906 or Cornelia.Schlenk@stonybrook.edu). Thank you for your interest in the Hard Clam workshop transcript.
