Docket No. 52-010

U.S. Nuclear Regulatory Commission  
Document Control Desk  
Washington, D.C. 20555-0001

Subject: Notification of SGI Clearances

GE-Hitachi Nuclear Energy (GEH) recently responded (Reference 1) to NRC Order EA-07-159. GEH provided further information in the Reference 2 letter concerning our program for the protection of Safeguards Information (SGI) related to reactor design, described in Engineering Operating Procedure 60-7.00. In the NRC response (Reference 3) approving that program and Reviewing Officials, GEH was requested to provide notification when we have determined that individuals who will have access to SGI have been authorized by one of its approved reviewing officials.

This letter provides notification that the individuals who will have access to the aircraft impact characteristics, when received from the NRC, have been authorized by one of the NRC-approved Reviewing Officials in accordance with the NRC-approved GEH SGI program that implements the requirements of the NRC Order EA 07-159. Should GEH determine that additional individuals require access to this information, they will be permitted access only after authorization by an NRC-approved Reviewing Official in accordance with the aforementioned GEH program for the protection of SGI related to reactor design.

If you have any questions or require additional information regarding the information provided here, please contact me.

Sincerely,

Robert E. Brown  
Senior VP, Regulatory Affairs

cc: Amy Cabbage (NRC)  
Mohammed Shuaibi (NRC)  
Wesley Held (NRC)  
James Kinsey (GEH)
