Subject: SNM -1270 - Docket 70-1220, Request For License Renewal

References: 1) License SNM-1270, Amendment No. 7, Docket No. 70-1220

2) Letter from Christopher Monetta to U.S. NRC, Director, Office of Nuclear Material Safety and Safeguards dated January 19th, 2007, (Request for NRC Consent to the Transfer of Control of GE Licenses to GE-Hitachi Nuclear Energy, Americas LLC)

Dear Director NMSS,

General Electric's License SNM-1270, Docket 70-1220 is scheduled to expire on September 30th, 2007. General Electric respectfully requests the U.S. Nuclear Regulatory Commission to renew the license to September 30, 2012. No changes are needed to the license requirements.

There is currently a pending amendment to transfer the license to GE-Hitachi Nuclear Energy Americas, LLC as requested by Reference 2 above. Should approval of the amendment to transfer the SNM-1270 license to GE-Hitachi Nuclear Energy, Americas LLC occur prior to September 30, 2007, GE requests the renewal be issued to GE-Hitachi Nuclear Energy, Americas LLC with an expiration date of September 30th, 2012. If transfer of the license to GE-Hitachi is not complete by September 30th, 2007, GE requests the renewal be issued to GE Energy, Nuclear.

If this request could be completed by September 30th, 2007, it would be greatly appreciated. Otherwise, GE requests a license extension to an appropriate date determined by the NRC that will support processing the renewal request and allow GE's continued use of the existing license after September 30th, 2007.

NMSS 01

If you have any questions or need additional information, please contact me at 925-862-4360 or Latonya.Mahlahla@ge.com
