Docket No. 50-400-LR

7/7/7

Change Concerns when we work together on it

48 nuclear Reactors

"48 ways to kill the United States of America"

Dear Nuclear Regulatory Commission

My name is Rudolph Williams and I have a few things to say about getting rid of a threat to our country. Yes, I am in prison for now, But we both know that living life concerns everyone, No matter where that person (we) may Be.

I am also an inventor who has come up, with the perfect way to produce electricity here in America and all over the world. As a father I have to always be

thinking of my Babys future, and just because I have enjoyed life in the past

Doesn't give me the right to do like a lot of the other Companies & People

that make up the nuclear reactors and say The hell with the Future Live for

Today. Everyone of us has a responsibility to the children who have yet to live

life. We must do all that we can to ensure the safety of their future now. I

mean really take a good look at what we are doing now, I do understand that

there has to be a level in which the United States must operate at. But we are

letting one thing blind our judgement of doing the right thing now, "MONEY" and

the love there of. I hear all the time that those 48 Nuclear Plants are also

looking for ways to create electricity without putting others around US lives

in jeopardy. But the truth be told its all a front, put on to keep you & the

rest of the world quiet about the Companies really looking for safer ways

of making electricity here in the USA. Now what I am about to say will prove

what I have all ready spoken about, I am an inventor, and I have created

a engine which produces electricity and it doesn't use any type of harmful

chemical or liquid to produce electricity. But here is the problem, No one even

②

comes to come & check out one word, that I am telling you now. Because I am locked up & I am not apart of their Company. So they really don't have to even consider what I am saying to you now. I have sent out letters to so many people telling them about the "I AM Coil", that is the name of the engine that I have created. Just think, within 40 days of them starting to produce one of these engine the other 47 Nuclear Plants will be able to start planning on making one for their area and shutting down "all" nuclear plants in the USA. Sounds to Good to be true, well do this and see for yourself, I am at Wayne Correctional Center 700 Stevens mill's road Goldsboro N.C. 27530, Give all of the 47 nuclear plants my name and a copy of this information about me and the "I AM Coil Engine". Then see who really takes you serious even though you are the NRC of the United States. Take a good moment to see what is going on here. I am looked at as stupid, because I have been sent to prison and no one wants to be involved with a person locked up in prison. But this person here (me) is the one who have figure out how to do something that they have been trying to do for over 40 years now. I have come up with a way to produce electricity without putting everything that we love in danger. I Don't want to put anyone out of Business. Just help them run a safer Business for the good of the whole world and not just where we live. So the next question is the most important question of this whole letter

Where Do you Stand On Helping Save The United States

It seems to me everyone producing electricity now, have to come through you so I know that I am talking to who is really important here

But will you help "This Prisoner Save" the future of the U.S.A and the future of our kids & their kids Lincoln, Gamma Prohibit Willi... The...
