Subject: Authorized Material

(NOTE: This will be used as the
 Documents Title in ADAMS)

Summary: The licensee requested to make adjustments to materials authorized by the license. In addition the licensee also requested authorization to perform leak tests following the procedures in Appendix J to NUREG 1556, Vol 1, Rev. 1. The request with regard to materials appeared to be confusing and I called the RSO to get clarification.

The RSO stated that the did not request any new material, but adjustment of the currently authorized material (combining few items together). I informed him that each item listed on the license is authorized for specific purpose, for example, certain items are authorized for storage only and can not be combined with similar items that are in use. He agreed and stated that the request to combine the material may be disregarded and only performance of leak tests be authorized.

Action Required: Process the request for leak test authorization only
