Dear Sir:

Subject: Salem Generating Station Units 1 and 2
Docket Nos. 50-272 and 50-311
License Change Request S06-07
Request for Change to Technical Specifications
Refueling Operations – Decay Time

PSEG Nuclear LLC submitted the proposed change to the Salem Technical Specifications by letter to the NRC dated August 4, 2006. The proposed amendment would revise the requirements for Fuel Decay Time prior to commencing movement of irradiated fuel based on a time calculated for each refueling outage by the Salem Spent Fuel Pool Integrated Decay Heat Management Program.

The BNE has no comments on the proposed change. If you need to discuss this subject further, please contact Elliot Rosenfeld at (609) 984-7548.

Sincerely,

Patrick Mulligan, Acting Manager
Bureau of Nuclear Engineering
