License No. 13-03459-02
Docket No. 030-01615

Dear Mr. Triana:

This refers to the routine safety inspection conducted by J. R. Mullauer of this office on April 22, 1992, of activities authorized by NRC Byproduct Material License No. 13-03459-02, and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated May 31, 1991, regarding apparent violations found during our April 25, 1991 inspection. We have no further questions regarding these matters.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

William H. Schultz, Chief
Nuclear Materials Inspection
