Rockville, MD 20852

Louisiana Energy Services, L. P.
National Enrichment Facility
NRC Docket No. 70-3103

Subject: License Basis Documents Update

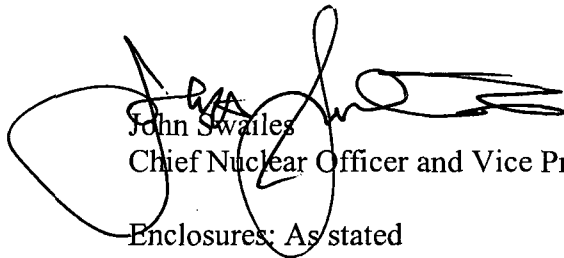

- Reference:
- 1) Letter from T.C. Johnson to J. Freels, Request for Additional Information on Organizational Changes, dated March 9, 2007
 - 2) Letter NEF-07-00031-NRC from J.H. Swales to the NRC, Additional Information on Organizational Changes, dated April 4, 2007

Enclosed are updates to several License Basis Documents for Louisiana Energy Services (LES) National Enrichment Facility. Although these updates are not required to be sent to the NRC at this time, LES is providing this intermediate update to reflect recently approved changes that have been incorporated into the design of the facility. Enclosed are pages with annotated changes for the Safety Analysis Report, the Quality Assurance Program Description, the Integrated Safety Analysis Summary, the Emergency Plan, and the Environmental Report. Since changes to these documents include reformatting, complete copies of each are included in lieu of page replacement instructions. Additionally, a compact disc containing Portable Document Format (PDF) copies of each is also included.

In the response to a request for additional information concerning the educational and experience requirements for a Criticality Safety Officer (Ref. 1), LES indicated that changes to the Safety Analysis Report would be incorporated in the next revision (Ref. 2). The enclosed document incorporates these changes.

The enclosed attachments are printed double-sided. If in the future, you would prefer to have single sided copies or if you have any other questions, please call Steve Cowne, Licensing Manager, at 505-394-4646.

Respectfully,

John Swailes
Chief Nuclear Officer and Vice President - Operations
