

NMED Item Number: 010965**Narrative:****Last Updated: 12/18/2002**

The licensee reported the loss of a seed source containing 12.1 MBq (0.327 mCi) of I-125. The licensee ordered 107 seeds, four seeds more than required for the planned implant procedure. The seeds were ordered from Mentor. Upon receipt of the seeds, no count was made to determine the actual number of seeds received. Upon completion of the implant procedure, only three of the four extra seeds were present. The licensee conducted a thorough search for the missing seed, but could not locate the seed. Mentor was contacted to see if they might have shipped one seed less than ordered, but their seed inventory showed no discrepancies. To prevent recurrence, the licensee modified their procedures for verifying and handling seeds.
