Thanks Julie, the foot is feeling a little better but it looks like I'll be on crutches for several more days. Making the letter and the meeting information public is not a concern. We don't intend to make any public statements or press releases about the project but as the letter will indicate the existence of the project is not confidential. I will have it for you by tomorrow.

Sam

Hi Sam,

I spoke to Brian Smith yesterday and he told me that you were planning to send in a letter, so I'll wait to receive it before finalizing my meeting summary. Once we receive it and publish a public meeting summary, do you think that there will be an issue with making the letter from AREVA to Chairman Klein publicly available? Let's plan to talk later this week. I hope you heal quickly, there's nothing worse than a foot injury. I hope that you at least won the game.

Julie

Julie,

I am planning to send you a letter and some attachments to notify you that we received our board approval to proceed with activities on the project and that the existence of this project is no longer confidential. The attachments will include a non proprietary version of the presentation we made to NRC on May 21 and an affidavit to hold some of the information provided in the version used at the meeting as proprietary. I was planning to send this out today but unfortunately I am at home nursing a bad foot injury I sustained playing soccer yesterday. I should be in the office on Wednesday and will send it then. In the meantime if you prefer to handle this differently let me know.
