Dear Mr. Reyes:

Thank you for your letter of July 18, 2007 to Under Secretary Reuben Jeffrey III requesting documents reflecting decisions made or actions taken by the Department of State with respect to the proposed renewal of the Oyster Creek Nuclear Generating Station (OCNGS) operating license and/or the consistency determination pursuant to the Coastal Zone Management Act of 1972, as amended (CZMA). I understand that this request is in connection with a pending appeal to the Secretary of Commerce by the owner/operator of OCNGS, AmerGen Energy Company LLC, for a favorable determination under the CZMA on license renewal for the facility.

This is to confirm that the Department of State had determined that it has made no decisions nor taken any actions with respect to the proposed license renewal or the related consistency determination.

Sincerely,

Andrew Semmel, Acting
Deputy Assistant Secretary for
Nuclear Nonproliferation Policy and Negotiations

Mr. Luis A. Reyes
Executive Director for Operations,
United States Nuclear Regulatory Commission,
Washington, D.C. 20555-0001.

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

July 18, 2007

cc: TP

Mr. Reuben Jeffrey III
Under Secretary for Economic, Energy
and Agricultural Affairs
U.S. Department of State
2201 C Street NW
Washington, DC 20520

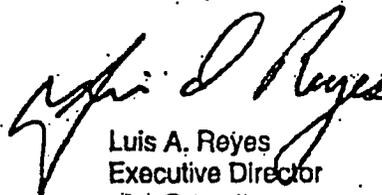

Dear Mr. Jeffrey:

On May 31, 2007, the State of New Jersey Department of Environmental Protection (NJDEP) completed its review of AmerGen Energy Company LLC's (AmerGen) request for a Federal consistency determination for Oyster Creek Nuclear Generating Station (OCNGS). Pursuant to Section 307 of the Coastal Zone Management Act of 1972 (CZMA) (Public Law 92-583), as amended, NJDEP found that it could not make a positive consistency determination. AmerGen plans to file an appeal with the Secretary of the U.S. Department of Commerce. On appeal, the Secretary will determine whether OCNGS furthers the national interest as articulated in the CZMA, in a significant or substantial manner; balance that interest against any adverse coastal effects; and consider reasonable alternatives (15 CFR § 930.121). The Secretary may also consider whether OCNGS is otherwise necessary in the interest of national security (15 CFR § 930.122).

In accordance with Section 382 of the Energy Policy Act of 2005, 16 USC § 1466 (2006), the U.S. Nuclear Regulatory Commission (NRC), as the lead Federal permitting agency for renewal of the OCNGS operating license, maintains, with cooperation of Federal and State administrative agencies, a consolidated record for consistency appeals under the CZMA. To ensure the completeness of this consolidated record, please provide documents reflecting all decisions made or actions taken (whether pending or final) by your agency related to the proposed renewal of the OCNGS license and or the CZMA consistency determination, including any supporting documentation or other documents relevant to such decision documents.

Please provide copies of your agency's documents within fourteen (14) days from receipt of this letter. If further information is required, please contact the project managers, Mr. David Wrona at 301-415-2292 or by e-mail at DJW1@nrc.gov; or Dr. Michael T. Masnik at 301-415-1191 or by e-mail at MTM2@nrc.gov.

Sincerely,

Luis A. Reyes
Executive Director
for Operations

Docket No. 50-219

cc: Mr. John B. Bellinger III, Legal Adviser

Temporary Commission

Federal Consistency Overview

The Coastal Zone Management Act (CZMA) was enacted on October 27, 1972, to encourage coastal states, Great Lake States, and United States territories and commonwealths (collectively referred to as coastal states) to develop comprehensive programs to manage and balance competing uses of and impacts to coastal resources. The CZMA emphasizes the primacy of state decision-making regarding the coastal zone. Section 307 of the CZMA (16 USC § 1456), called the federal consistency provision, is a major incentive for states to join the national coastal management program and is a powerful tool that states use to manage coastal uses and resources and to facilitate cooperation and coordination with federal agencies.

Federal consistency is the CZMA requirement where federal agency activities that have reasonably foreseeable effects on any land or water use or natural resource of the coastal zone (also referred to as coastal uses or resources and coastal effects) must be consistent to the maximum extent practicable with the enforceable policies of a coastal state's federally approved coastal management program. (Federal agency activities are activities and development projects performed by a federal agency, or a contractor for the benefit of a federal agency.)

Federal license or permit activities and federal financial assistance activities that have reasonably foreseeable coastal effects must be fully consistent with the enforceable policies of state coastal management programs. (Federal license or permit activities are activities proposed by a non-federal applicant requiring federal authorization, and federal financial assistance activities are proposed by state agencies or local governments applying for federal funds for activities with coastal effects.)

A lead state agency performs federal consistency reviews (usually the same agency that implements or coordinates the state's federally approved coastal management program). At the federal level, the Office of Ocean and Coastal Resource Management (OCRM), within the National Oceanic and Atmospheric Administration's (NOAA's) National Ocean Service (NOS), among other duties and services, interprets the CZMA and oversees the application of federal consistency; provides management and legal assistance to coastal states, federal agencies, tribes and others; and mediates CZMA related disputes. NOAA's Office of the Assistant General Counsel for Ocean Services assists OCRM and processes federal consistency appeals to the Secretary of Commerce.

For more detailed information, please see the document "Federal Consistency Requirements" and NOAA's federal consistency regulations. Both of these documents are found at the [Federal Consistency Resources page](#).
