SUBJECT: ERRATA of WATERFORD STEAM ELECTRIC STATION, UNIT 3 –  
NOTIFICATION OF NRC INITIAL OPERATOR LICENSING EXAMINATION  
05000382/2007302

Dear Mr. Walsh:

The Waterford Steam Electric Station, Unit 3, initial examination notification letter dated August 8, 2007, (ML072210747) contained an incorrect docket number in the subject line. Please replace that letter with the one enclosed with this letter. We regret any inconvenience this may have caused.

Sincerely,

Killona, LA 70057-3093

SUBJECT: WATERFORD STEAM ELECTRIC STATION, UNIT 3 - NOTIFICATION OF NRC  
INITIAL OPERATOR LICENSING EXAMINATION 05000382/2007302

Dear Mr. Walsh:

In a telephone conversation on August 1, 2007, between Messrs. Keith Vines, Senior Operations Instructor, and Tom Stetka, NRC Chief Examiner, arrangements were made for the administration of licensing written retake examinations at the Waterford Steam Electric Station on November 8, 2007.

As agreed during the telephone conversation, your staff will prepare the examination based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC's regional office will discuss with your staff any changes that might be necessary before the examination is administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outline by August 29, 2007. The written examination and supporting reference materials identified in Attachment 2 to ES-201 will be due by September 28, 2007. Pursuant to Title 10, Section 55.40(b)(3), of the Code of Federal Regulations, an authorized representative of the facility licensee shall approve the outline and written examination before they are submitted to the NRC for review and approval. The examination shall be complete and ready-to-use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examination to be rescheduled.

In order to conduct the requested written examination, it will be necessary for your staff to provide adequate space and accommodations, and to administer the examination in accordance with ES-402.

Appendix E to NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examination is being administered.

To permit timely NRC review and evaluation, your staff should submit the preliminary reactor operator license application (Office of Management and Budget (OMB) approval Number 3150-0090), the medical certification (OMB approval number 3150-0024), and waiver requests (OMB approval number 3150-0090) at least 30 days before the first examination date. If the application is not received at least 30 days before the examination date, a postponement may be necessary. A signed application certifying that all training has been completed should be submitted at least 14 days before the examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by OMB, under approval number 3150-0018, which expires on June 30, 2009. The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examination, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet electronic mail to [BJS1@nrc.gov](mailto:BJS1@nrc.gov); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-018), Office of Management and Budget, Washington, DC 20503.

The NRC may neither conduct nor sponsor, and a person is not required to respond to, an information collection, unless it displays a currently valid OMB control number.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/adams/index.html>.

Thank you for your cooperation in this matter. Mr. Vines has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Tom Stetka at 817-860-8247, or myself at 817-860-8159.

Sincerely,

Anthony T. Gody, Chief  
Operations Branch  
Division of Reactor Safety
