Anthony McMurtray, Chief
Regulatory Improvements and Outreach Branch
Division of Preparedness and Response
Office of Nuclear Security and Incident Response
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

SUBJECT: FEMA ACCEPTANCE REVIEW OF THE OFFSITE EMERGENCY RESPONSE
PLANS FOR THE COMBINED LICENSE APPLICATION – UNISTAR NUCLEAR
OPERATING SERVICES AND CONSTELLATION GENERATION GROUP, LLC, CALVERT
CLIFFS NUCLEAR POWER STATION

Dear Mr. McMurtray:

In reference to your letter dated July 23, 2007, we have received from your office, the UniStar Nuclear Operating Services and Constellation Generation Group, LLC, COL application for the Calvert Cliffs site. The Radiological Emergency Preparedness (REP) Program staff, from our Regional Office, has reviewed the offsite emergency response plans provided in the COL application. In summation, we have found that all documents necessary for starting the review of offsite emergency preparedness for the Calvert Cliffs Nuclear Power Station Early Site Permit and Combined Operating License were submitted.

It is understood that we may need to make future requests for additional information in order to adequately support the FEMA effort in the technical review process. Should you and/or members of your staff have any questions regarding this matter, please contact Mr. Mike Takacs at (703) 605-4212 or Mr. James Purvis at (703) 605-1522.

Sincerely,

for Vanessa Quinn, Chief
Acting Director
Technological Hazards Division
