Subject: Re: Pre-app Readiness Assessment

We'd like to hear from the applicants for the following sites. They can call me or send email to preapp_siting@nrc.gov. (Note there is an underscore between preapp and siting.)

River Bend
Nine Mile Point
Susquehanna
Amarillo
Fermi
Alternate Energy Holdings - Idaho ?????

We also have nothing scheduled yet for the following plants but they don't need a reminder.

Vogtle
Exelon - Texas (I have a phone message from Ken Ainger to discuss schedule)

The readiness assessments already conducted or scheduled are shown on the attachments.

>>> Stephanie Coffin 07/19/2007 7:01 PM >>>
Brent,

Sorry to be scatter brained but could you help me by letting me know which sites have NOT been scheduled for their various T-1s, C-3s, etc. I know visits have been made to various AP1000 sites, and one to TXU next week. That will help the safety PMs tremendously in knowing which COL contact needs to be made, for what purpose, for how many visits, etc. Also, we may need a POC from your group to support a teleconference to discuss these visits - would that be Mike W?

Stephanie

>>> Brent Clayton 07/10/2007 4:48:49 PM >>>

Please ask your PMs to inform the expected applicants and DCWG contacts that we have resources to do some readiness assessment visits in September and beyond. I think they already know that these activities are one of our planning assumptions for being able to complete their FEIS within 24 months.

In case they don't have our available weeks handy, they are listed in the attached presentation.
