Hope Creek Generating Station
Facility Operating License No. NPF-57
NRC Docket No. 50-354

Subject: Supplement to License Amendment Request to Relocate Component Lists for Primary Containment Isolation Valves from Technical Specifications

Reference: 1) Letter from George P. Barnes (PSEG Nuclear LLC) to USNRC, November 15, 2006, "License Amendment Request to Relocate Component Lists for Primary Containment Isolation Valves from Technical Specifications"

In Reference 1, PSEG Nuclear LLC (PSEG) requested an amendment to Facility Operating License NPF-57 and the Technical Specifications (TS) for the Hope Creek Generating Station (HCGS) to remove valve component lists and references to the lists from the Technical Specifications (TS).

This letter provides additional information regarding the control of the Technical Requirements Manual (TRM). Reference 1 stated that the information contained in the deleted tables would be relocated to the HCGS TRM, and that changes to the TRM will be reviewed pursuant to 10 CFR 50.59.

The TRM will be controlled in a manner consistent with procedures fully or partially described in the HCGS updated final safety analysis report (UFSAR). A description of the TRM and the requirement to control TRM changes under 10 CFR 50.59 will be included in the UFSAR when the proposed change to the TS is implemented. The controls for the HCGS TRM will be in accordance with NEI 98-03, Rev. 1, "Guidelines for Updating Final Safety Analysis Reports."

PSEG has determined that the information contained in this letter does not alter the conclusions reached in the 10CFR50.92 no significant hazards analysis previously submitted.

The regulatory commitment for control of TRM changes is provided in Attachment 1 to this letter.

Should you have any questions regarding this submittal, please contact Mr. Paul Duke at 856-339-1466.

I declare under penalty of perjury that the foregoing is true and correct.
