Subject: Renewal of License Number 29-15765-02, The College of New Jersey  
Mail Control Number 140924 Addition

Dear Licensing Assistance Team:

Regarding Mail Control Number 140924 and in reference to the application for renewal of License Number 29-15765-02 for The College of New Jersey dated August 2, 2007, please note the following:

- Although *Item 5: Radioactive Material* of the renewal indicated there were "no changes" in licensed materials from the previous license, the list provided did not include Sulfur 35. The College of New Jersey requests that Sulfur 35 in any form with a maximum possession amount of 10 millicuries be included on the license. This request is consistent with the expiring license.

Your consideration of this request is greatly appreciated. Please contact Brian Webb, Manager of Risk, Occupational Safety and Environmental Services at (609)771-2881 or [bwebb@tcnj.edu](mailto:bwebb@tcnj.edu) for any additional information you may need to expedite this application for renewal.

Sincerely,

Dr. Jeffrey M. Osborn  
Radiation Safety Administrator,  
Dean of School of Science
