Tennessee Valley Authority
ATTN: Mr. S. A. White
Manager of Nuclear Power
6N 38A Lookout Place
1101 Market Street
Chattanooga, TN 37402-2801

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-390/88-02 AND 50-391/88-02

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by G. A. Walton on April 5, 1988 to May 9, 1988. The inspection included a review of activities authorized for your Watts Bar facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. These areas included followup on previously identified findings, work observations and cleanliness. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

One unresolved item was identified regarding the adequacy of procedures for evaluating conditions adverse to quality for generic implications at other TVA nuclear facilities. This will be further reviewed during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Original signed by W. Little

Kenneth P. Barr, Acting Assistant.
Director for Inspection Programs
TVA Projects Division
Office of Special Projects
