 or Report No(s).

Name of Licensee: Metal Management, Inc.
 Name of Participant(s): Wendy Garner & Sattar Lodhi
 Telephone No. 973 344 2696 ext. 32
 Subject: Inventory of gauges

(NOTE: This will be used as the Documents Title in ADAMS)

Summary:

The licensee stated that the SSD Registration certificate for the fixed gauge authorized on the license has been revised and the sealed source model number is changed in the revised certificate. I checked in NRC data base for the device and found that the certificate was dated 2005. I requested the licensee to send me a copy of the revised certificate. The licensee's contractor sent the certificate via e-mail and the revised certificate was dated December 14, 2006, and the revised certificate does have the sealed source model changed.

I called the licensee to obtain total number of gauges that they possess or want to acquire so that maximum possession limit may be specified in the amended license. She stated that they have not acquired any gauge yet and do not possess any material and they will acquire only one gauge at the present time. The gauge was on site and still in the crate but the sealed source had not been delivered yet.

I inquired about the status of RSO (Joseph Natale) and she told me that he is no longer with the company and that she will be the new RSO, after she completes the training scheduled for September 17, 2007.

I reminded her that their license condition requires that before acquiring licensed material, the RSO must complete the required training, and based on that commitment, we can amend the license to change the RSO because they do not have material yet. She stated that the source will not be arriving before she completes her training.

Action Required: Document and complete the review and amend the license
