Region II
Attention: Dr. J. Nelson Grace, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30323

Dear Dr. Grace:

WATTS BAR NUCLEAR PLANT UNIT 1 - THIRD SUPPLEMENTAL RESPONSE TO DEVIATION
390/85-33-01 - FAILURE TO MAINTAIN 480 VOLT SHUTDOWN BOARD CIRCUIT BREAKER
OPEN AND ALARMED IN CONTROL ROOM WHEN THIS CONDITION IS NOT MET

We responded to D. M. Verrelli's letter dated May 7, 1985, report numbers
50-390/85-33 and 50-391/85-28 concerning the subject deviation by letter dated
June 14, 1985. The first supplemental response was submitted on August 7,
1985. Our second supplemental response was submitted on September 11, 1985.
Below is our third supplemental response.

In our second supplemental response to the subject deviation, we committed to
complete corrective actions for the review of the plant walkdown (commitments
12.002 and 12.005) by October 1, 1985 and repair door C20 (commitment 10.008)
by September 30, 1985. As discussed with Mr. Verrelli on October 2, 1985 and
Al Ignatonis on October 17, 1985, these commitments have been missed.

Our commitments 12.002 and 12.005 have been rescheduled to November 1, 1985 as
a result of our concentrated effort on the qualification of electrical
equipment program. Commitment 10.008 has a new completion date of
November 15, 1985 because welding has been limited to only critical activities
under strict administrative controls while procedures are being revised to
enhance our welding program.

If there are any questions, please get in touch with R. H. Shell at
FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
