REFERENCE: (1) Docket No. 70-143; SNM License 124
(2) HEU FNMC Plan Section 1, Revision 21, dated June 2007
Section 3, Revision 8, dated June 2007
Section 4, Revision 17, dated June 2007
Annex A, Revision 6, dated June 2007
Annex D, Revision 3, dated June 2007

Subject: HEU FNMC Plan Changes

Dear Sir:

Enclosed are three copies of the referenced sections of the Nuclear Fuel Services, Inc. (NFS) Fundamental Nuclear Material Control (FNMC) Plan (10 CFR Part 74 Subpart E), submitted under the provisions of 10 CFR Part 70.32. Section 1 was revised to add Inductive Coupled Plasma Mass Spectrometry (ICP-MS) as an isotopic measurement technique and control unit 37. Section 3 was revised to include the alarm resolution response for control unit 37. Section 4 was revised to include the measurement procedure for the ICP-MS as a critical procedure and one minor title change. NFS has evaluated and determined the ICP-MS method performs equivalent to the Thermal Ionization Mass Spectrometry (TIMS) and is an acceptable method for MC&A isotopic determination. Annex A and Annex D were revised to make minor corrections and to include current information. None of the changes decrease the effectiveness of the material control and accounting program or the measurement control program as implemented pursuant to 10 CFR Part 74 Subpart E.
