Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC INSPECTION REPORT 50-390/80-26
AND 50-391/80-20 - SUPPLEMENTAL RESPONSE TO VIOLATON 50-390/80-26-01

The subject inspection report dated September 30, 1980 cited TVA with one deviation concerning UHI preoperational testing. Our response was submitted on October 27, 1980 and a revised response was submitted on March 25, 1982.

As discussed with NRC-OIE Inspector J. D. Wilcox on July 1, the date of July 1, 1982 for completion of corrective actions indicated in our last report on this matter was not met. TVA believes that the UHI scope revision provided by Westinghouse requires additional clarification, and the original scoping document requires further revision. TVA has requested this and is awaiting a reply. The corrective action on this matter will be completed by October 31, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

James A. Domer
