SUBJECT: SHEARON HARRIS NUCLEAR POWER PLANT, UNIT 1 – CORRECTION TO
TECHNICAL SPECIFICATION PAGE ISSUED WITH AMENDMENT NO. 125
ISSUED ON JULY 23, 2007 (TAC NO. MD3895)

Dear Mr. Duncan:

On July 23, 2007, the Nuclear Regulatory Commission issued Amendment No. 125 to Facility Operating License No. NPF-63 for the Shearon Harris Nuclear Power Plant (HNP), Unit No. 1, in response to your request dated December 20, 2006.

This amendment revised the HNP Technical Specifications (TS) to change the administrative controls associated with worker access to high and very high radiation areas to be consistent with Section 20 of Title 10 to the *Code of Federal Regulations* and Regulatory Guide 8.38, "Control of Access To High and Very High Radiation Areas in Nuclear Power Plants," Revision 1. The changes included differentiating dose rates associated with high and very high radiation areas, adding requirements for groups entering high radiation areas, and clarifying the communication requirements for workers in high radiation areas.

A typographical error was found on one of the camera-ready TS pages issued with the amendment. The error involved the misspelling of the word "equipment" in page 6-26 of TS 6.12 "High Radiation Area," Section 6.12.1.a.

A corrected license amendment page is enclosed. We regret any inconvenience this may have caused. If you have any questions regarding this matter, please call me at (301) 415-3178.

Sincerely,

/RA/

Marlayna Vaaler, Project Manager
Plant Licensing Branch II-2
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

Docket No. 50-400

Enclosure: As stated

cc: See next page
