SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 50-17446-01

The U.S. Nuclear Regulatory Commission (NRC) is in receipt of your NRC Form 314 dated August 3, 2007, requesting termination of your NRC radioactive materials license. The supporting documentation to the NRC Form 314 adequately documents the disposition of your six QSA Global, Inc. (formerly AEA Technology QSA Incorporated) Model 660 system radiography cameras, three iridium-192 sources, and one Tech Ops Model 773 calibrator containing one cesium-137 source.

The supporting documentation to the NRC Form 314 also provided a copy of the leak test results for the six cameras. The leak test results document that there was no evidence of leakage of radioactive material from the sealed sources. Additionally, the records provided documents the receipt of the radioactive material by licensed parties, as recorded on the NRC Form 314. Based on the documentation submitted, the staff concluded that all licensable radioactive material has been removed from the facility and the facility is authorized for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. The facility at 2931 Pelican Drive, Anchorage, Alaska is suitable for unrestricted use and NRC license number 50-17446-01, for the facility, is hereby terminated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and the enclosed license termination will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
