To the United States Nuclear Regulatory Commission:

This letter is an attestation statement from myself as an authorized user (AU) of High Dose Rate (HDR) afterloading brachytherapy that Dr. Matthew M. Poggi has satisfactorily completed the requirements in 10 CFR 35.690 (b) (1), (b) (2), and (c) and has achieved a level of competency sufficient to function independently as an HDR AU.

During his residency training from 01 July 1999 to 31 June 2003, Dr. Poggi received all of the mandatory classroom, laboratory and safety training including reviewing full calibration measurements and periodic spot-checks; preparing treatment plans and calculating treatment doses and times; using administrative controls to prevent a medical event; implementing emergency procedures to be followed in the event of the abnormal operation of the medical unit or console; checking and using survey meters; and selecting the proper dose and how it is to be administered.

Dr. Poggi has had sufficient training in device operation, clinical use and safety procedures.

Dr. Poggi was certified in Radiation Oncology by the American Board of Radiology in June, 2003.

As a preceptor HDR AU, I have proctored Dr. Poggi in six vaginal cylinder case and four tandem and ovoid HDR insertions since 01 July 2007 to the present.

If there are any questions in regard to this attestation, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read 'Stephen Banks'.
