Region II
Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION
REPORT 50-390/81-19, 50-391/81-19 - ADDITIONAL INFORMATION

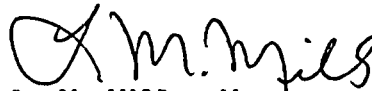

The subject inspection report dated October 8, 1981 cited TVA with one Severity Level V and one Severity Level VI violation in accordance with 10 CFR 2.201. TVA submitted reports on the violations on November 10 and December 28, 1981. Our final response was submitted on January 25, 1982, and supplemental information was submitted February 17 and April 12, 1982.

As discussed with NRC-OIE Inspector J. D. Wilcox on June 28, the date of June 30, 1982, for completion of corrective actions indicated in our final report on this matter has not been met. Due to the general review and upgrading of the Quality Control Procedure (QCP) program, the inspection of locking devices will be included in a new QCP, 4.07, instead of in a revision to QCP-1.42. This new QCP will be issued by July 28 and all other corrective actions will be completed by August 25, 1982.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
