Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION REPORT  
50-390/81-19, 50-391/81-19 - FURTHER SUPPLEMENTAL INFORMATION

The subject inspection report dated October 8, 1981 cited TVA with one Severity Level V and one Severity Level VI violation in accordance with 10 CFR 2.201. TVA submitted reports on the violations on November 10 and December 28, 1981. Our final response was submitted on January 25, 1982, and supplemental information was submitted February 17, 1982.

As discussed with NRC-OIE Inspector R. V. Crlenjak on March 30, the date of March 31, 1982, for completion of corrective actions indicated in our last report on this matter was not met. TVA has not completed the revision of procedure WBNP-QCP-1.42 because of other priorities. Since the procedure has not been revised, the incorrectly installed locking devices have not been reinstalled correctly. The corrective action on this matter will be completed by June 31, 1982.

If you have any questions, please get in touch with R. H. Shell at  
FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
