Dear Mr. O'Reilly:

WATTS BAR NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION  
REPORT 50-390/81-26, 50-391/81-24 - SUPPLEMENTAL RESPONSE TO VIOLATION  
50-390/81-26-04, 50-391/81-24-03

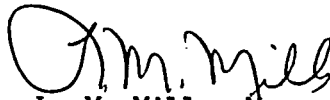

The subject inspection report dated December 23, 1981 cited TVA with four Severity Level V Violations in accordance with the provisions of 10 CFR 2.201. Our responses were submitted February 5, 1982. A revised response and supplemental information on the subject violation were submitted on April 8 and September 15, 1982, respectively. In our last report, TVA committed to be in full compliance by November 3, 1982. However, as discussed with Inspector D. Quick on November 5, 1982, TVA has not yet completed its assessment of the cleanliness of the HVAC system. We now anticipate this being completed by February 1, 1983.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
